Summer Internship Report

Batch : 2023-27

Experiential Learning in B.Tech at Universal AI University – School of AI & Future Technologies

- Experiential learning is a core part of the B.Tech program, focusing on practical skills, real-world problem-solving, and industry exposure.

- The curriculum integrates hands-on projects, industrial visits, and workshops, moving beyond traditional classroom learning.

- A strategic partnership with LTIMindtree, a leading global tech company, aligns academic content with current industry needs

- This collaboration provides students with access to cutting-edge technologies, tools, and real business practices, preparing them for the workforce from day one.

- Industrial visits offer valuable exposure to real-time operations and modern workplace environments, helping students connect theory with practice.

- Mini projects, conducted every semester, promote teamwork, innovation, and the application of classroom knowledge to real challenges.

- Workshops led by industry experts and faculty focus on emerging technologies like AI, Machine Learning, IoT, Data Science, and Cloud Computing.

- These sessions are interactive and outcome-oriented, equipping students with practical knowledge and confidence.

- The program cultivates industry-ready engineers capable of innovating, adapting, and thriving in a rapidly changing tech landscape
.
- With a strong focus on experiential learning, students are empowered to make a meaningful impact in their careers and society.

Here's a glimpse into some of the opportunities our students are pursuing over summer!
